The most relevant references to the Applicants' claimed inventions are Voelker (U.S. Pat. #: 5,831,071), Borchering et al. (U.S. Pat. #: 5,802,143), Bartolutti et al. Furthermore, none of them, in combination or alone, clearly teaches or fairly suggest a method of testing a telephone line for operability comprising the logical sequence steps as recited in the independent claim 35. Lastly, none of them, in combination or alone, clearly teaches or fairly suggest a test unit such as test unit 20 as shown in figure 1 for determining whether a local telephone company demarcation point device (i.e., element 12 shown in figure 1) is providing telecommunications signals to one of a plurality of telephone lines of a telephone system, as recited in the independent claims 19 and 27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
